

## **LEAVITT TUBE COMPANY QUALITY POLICY**

Leavitt Tube is dedicated to the production of quality steel tubing and to building lasting relationships with our customers. We believe the best way to do this is by involving our employees and encouraging their continuous improvement in every aspect of our business.

### **QUALITY OBJECTIVES**

Under our new Quality Management System, we've established stringent goals for quality and efficiency. We strive to exceed ASTM, governmental and our own, even more exacting standards, for product tolerances and specifications.

But we're never satisfied.  
When we reach our goals, we set new ones, so that we're continuously working to improve every aspect of our performance.
