RE: RoHS Compliance

Dear Valued Customer:

Maruichi Leavitt Pipe & Tube is a manufacture of carbon steel tubing and is compliant with Directive 2002/95/EC on the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment.

This letter certifies to the best of our knowledge, the raw material used in the manufacturing of our carbon steel tubing products complies with the latest RoHS directive. We have statements from our coil suppliers which state that none of the restricted items listed are contained in their material. Coolants and rust preventatives used on our tubing are free of the listed raw materials.

Sincerely,

A handwritten signature in purple ink, appearing to read "Shunsaku Honda", is written over a light blue horizontal line.
