

A53 STANDARD ERW PIPE

Maruichi Leavitt has been producing Structural, Mechanical, and HI-Y 50 Structural Pipe Size Tubing for over 55 years. In 2013 we began producing A53 Standard ERW Pipe. We have expanded our Chicago South Plant Warehouse and added a state of the art pipe processing line to our large structural mill. We are now producing ASTM A53 Grade B in NPS 4" to 12" with wall thicknesses from 0.154" to 0.500" plain end pipe beveled to an angel of 30°. Our pipe is seam annealed and coated making it easier to work with while extending its durability. Maruichi Leavitt stocks pipe in NSP 4" to 12" standard walls in both Singles (21') and Doubles (42'). We are a proud producer of Made and Melted USA A53 Standard ERW Pipe.
